---

## Education

Bsc Computer Science ( Vartak College , Vasai )	Currently Pursuing	2023 - 2025
HSC ( Vartak College )	80%	2022
SSC ( Utkarsha Vidyalya )	93.80%	2020

---

## Technical Skills :

**Languages :** JavaScript , Python , C++ , HTML/CSS

**Library :** react.js , redux-toolkit

**Frameworks :** Flutter , Tailwind css

**Developer Tools :** Git , Github

**Databases :** MongoDB , oracle , MySQL , Firebase , Appwrite

---

## Experience :

**Freelance Project :** <https://mahadeoirkar.com/>

Created a dynamic and visually appealing portfolio website using React, Firebase, and CSS, deployed on Vercel. Integrated a Node.js backend for efficient mail service handling, providing a seamless and responsive user experience.

## Projects:

**Image to Pdf Converter :** Flutter , Dart

- Developed a Flutter application that converts images to PDF, allowing users to add images via camera or from storage.
- Implemented functionality to store the generated PDFs directly on the user's mobile device for easy access and sharing.

**News Web Application :** JavaScript , react , redux , appwrite , firebase cloud messaging, tailwind css

- users can view news according to category and language
- Integrated user authentication, allowing users to create accounts, log in, and manage their news preferences.
- Enabled users to save and delete news articles, with saved news details accessible on a dedicated account page.
- Set up daily notifications using Firebase Cloud Messaging, keeping users updated with the latest news.

### Recipe Web Application : JavaScript , react , CSS

- Implemented a search functionality that allows users to search for specific recipes by name or ingredient.
  - Displayed detailed recipe information, including ingredients, cooking instructions, and nutritional facts.
  - Integrated a responsive UI that adjusts seamlessly across different screen sizes.
  - Included user-friendly error handling for failed API requests or no results found.
- 

### **Additional Skills :**

- Understanding of fundamental data structures including arrays, linked lists, stacks, queues, trees, and graphs.

\*Also I worked as a committee member in our college technical fest called BITS in which i am part of website development team link of website : <https://bits24.onrender.com/>
